

# *Northern New Mexicans Protecting Land, Water, and Rights, Inc.*

**At Last!**

**An organization committed to protecting the interest and rights of all peoples of Northern New Mexico!**

*Open your eyes, community members! It is time to become informed and united! Lets move together in improving our beautiful communities.*

*Northern New Mexicans Protecting Land, Water, and Rights, Inc. (NNMProtects) is a non-profit organization devoted to ensuring the social welfare in areas not properly attended by county, state and federal governments. Current and past community issues have either fallen on deaf ears, have been blatantly disregarded and in fact, have gone forward for vote and approval without input from the people whose lives they impact. NNMProtects is working hard to stop the approval of the final decree in the Aamodt Water Case, working hard on rescinding the recent Jemez Electric Rate Hike and pursuing the Bureau of Indian Affairs' (BIA) claim that County Road 84 is being trespassed by non-pueblo residents. Since the creation of NNMProtects, July 2014, its members have executed a charter and mission and obtained state and federal exempt status.*

*If you care about your surface and underground water rights, if you need access to your property, if you can't afford an increase in your electric rate, then please join NMMProtects. It is time to get behind a group of individuals who spend an immeasurable of time correcting the injustices that have already been done to our communities. There is still time to make things right for the sake of children and grandchildren. Please join! It's Free!*
